# Speeding Up Software Development at Choice Hotels

Automating Application Resource Provisioning and Unifying Infrastructure Management

WHY VMWARE vREALIZE SUITE?

VMware vRealize™ Suite is a cloud management platform that is purpose-built for the hybrid cloud, with a unified management experience that delivers fast time to value.

BEFORE:
Manual provisioning and siloed resource management

AFTER:
Automated self-service provisioning and unified management

MONTHS TO PROVISION

Manually provisioning new infrastructure for development teams took **4–6 weeks.**

INFRASTRUCTURE IN MINUTES

New resources are ready to use in less than

30 minutes.

TROUBLESHOOTING BLIND

Separate tools for physical, virtual, and cloud resources made it hard to solve problems.

MANAGEMENT WITH A UNIFIED VIEW

Now problems are often found and resolved *before* they cause downtime.

WASTEFUL OVERPROVISIONING

With manual deployment, new applications were often overprovisioned, leading to waste and high expense.

AUTOMATED EFFICIENCY

In just a few weeks, Choice Hotels reclaimed more than 100 overprovisioned virtual machines, reducing hardware requirements.

LONG WAITS FOR BUSINESS TOOLS

Delayed resource provisioning slowed application delivery to the business.

FASTER TIME TO VALUE

Provisioning delays are a thing of the past.
